

UCI School of Medicine Department of Urology Presents: The 2020 Summer Surgery Program!!

Now Accepting Applications!

Only 24 spots per session

Session Dates:

Session I: July 6th - July 17th

Session II: July 20th - July 31st

Join us this summer!

The Department of Urology at UCI Health is once again hosting its Summer Surgery Program for high school students. This program allows students to gain hands-on, once in a lifetime experience in the fields of surgery and medicine.

This summer, we're offering two, two-week sessions for mature high school students at least 16 years old who have excelled academically. Space is limited to 24 students per session.

Given the intimacy of the program and nature of the instruction, program tuition is \$4,550 per student, or \$5,850 with room and board for out of town/international students.

To apply for UC Irvine's Summer Surgery Program, students must be at least 16 years old, have a minimum GPA of 3.5, and be currently enrolled in high school (2020 senior graduates welcome).

Program scholarships are available

Let's spend this summer innovating!

What to expect:

- ❖ Students enter the operating room & observe live surgeries
- ❖ CPR training and BLS certification
- ❖ Medical student and college mentor support throughout the program
- ❖ Fetal Pig Dissection Course
- ❖ Hands-on training with da Vinci Robot
- ❖ Learn actual surgical skills in open laparoscopic & robotic surgery

For complete information and program application, please visit our website at:

"I love the UCI Summer Surgery program. This program confirmed my ambitions to aim for medical school. It allowed me to see the lifestyle of a surgeon and get foundational advice from medical students. The mentors and peers truly ignite an atmosphere of innovation and passion! Seeing surgical cases was truly fascinating and this opportunity at such a young age simply invigorating! I came curious about the medical field. I left with lifelong memories, amazing insights, and even more curiosities I hope to one day indulge in as a doctor." - Ruben

"The UCI Summer Surgery Program is an invaluable medical experience that offers unique hands-on experiences in both the hospital and labs. This program has confirmed my passion for medicine due to it's knowledgeable and caring physicians, staff, and mentors, as well as the core values from which it was established." - Mark

"Through the Summer Surgery Program, I gained such valuable experiences that I would never trade for anything else. I not only became more exposed to the medical field, which deepened my interest, but I also was able to meet such a diverse group of people from peers to mentors. My favorite part of the program was visiting the Operating Rooms and working on the research project with my group!" - Jenny

Hello Parents and Students,

As the program creator and chief supervisor, I see firsthand the tremendous impact our program has on youth. Our program is aimed to inspire high school students to pursue their interest in medicine by exposing them to hands-on experiences across several fiends of healthcare. The Summer Surgery Program is an opportunity for students to discover their passion for medicine and to promote innovative thinking. We would love to have your child join us this summer!

-Dr. Jaime Landman, Professor and Chairman of the Depart of Urology
